Puppy Crate Training Day

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A gentle crate training day with treats and the door always open: first sniff, a treat trail inside, a chew toy in the crate, walking in on her own and an evening nap inside.

TIMELINE

0-5s	First sniff
5-10s	Treat trail
10-15s	Chew inside
15-20s	Walks in alone
20-25s	Evening nap inside

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 9-week-old female solid black German Shepherd puppy with fluffy all-black fur, oversized paws and floppy ears that are just starting to stand, wearing a small green collar. 0-5s (First sniff): Living room, morning daylight from a window, worn brown carpet, a black wire crate with a soft grey pad and a folded blanket inside, the door wide open. The puppy walks around the crate slowly, sniffing the bars and the pad, tail wagging low, then sits beside it. Sound: quiet room, sniffing, owner says softly "that's your new room". 5-10s (Treat trail): Same living room, morning daylight. The owner's hand places small treats one by one on the carpet leading to the open crate door and one on the pad inside. The puppy eats each treat, steps inside with her front paws to get the last one and backs out happily. Sound: tiny crunching, owner says "good girl, yes". 10-15s (Chew inside): Living room, midday daylight. The puppy lies inside the crate on the grey pad with the door wide open, holding a red rubber chew toy between her front paws and chewing on it calmly. The owner sits nearby on the carpet, only legs visible at the edge of frame. Sound: soft chewing, a car passing outside, owner says "so calm". 15-20s (Walks in alone): Living room, afternoon daylight, crate door open. The puppy trots across the carpet carrying a small plush toy, walks straight into the crate on her own, turns around twice and lies down with the toy. The owner's hand drops a treat inside as a reward. Sound: paws on carpet, treat landing on the pad, owner whispers "yes". 20-25s (Evening nap inside): Living room in the evening, ordinary warm lamp light, the crate door still wide open. The puppy is fast asleep inside on the blanket, curled into a ball with her nose under her paw. The camera moves closer slowly and quietly as she sighs in her sleep. Sound: quiet house, tiny snores, owner whispers "best day".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | First sniff

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
