Puppy Potty Training Wins

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Celebrating the small potty training wins: an early morning trip outside, a treat and praise, nosing the door bell, a rainy trip under an umbrella and the last trip of the night.

TIMELINE

0-5s	Early trip out
5-10s	Treat and praise
10-15s	Rings the bell
15-20s	Rainy trip
20-25s	Last trip of night

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 9-week-old female solid black German Shepherd puppy with fluffy all-black fur, oversized paws and floppy ears that are just starting to stand, wearing a small green collar. 0-5s (Early trip out): Backyard at dawn, cool grey-blue light, wet patchy grass, a wooden fence. The owner, in slippers and pajama pants, sets the puppy down on the grass. She sniffs around in a small circle with her nose to the ground, then squats briefly on the grass. Sound: early birds, quiet street, owner whispers "go potty". 5-10s (Treat and praise): Same backyard at dawn, cool grey light. The puppy trots back toward the owner's slippers and sits. The owner's hand gives her a small treat and rubs her fluffy head. She wiggles, tail wagging fast, and licks the owner's fingers happily. Sound: owner says "yes, good girl, yes", tiny crunch, birds. 10-15s (Rings the bell): Back door in the kitchen, midday daylight, beige tile floor, a short strip of fabric with small brass bells hanging from the door handle. The puppy walks up and nudges the bells with her nose, making them ring, then looks back at the camera expectantly. Sound: bells jingling, owner gasps and says "you rang it!". 15-20s (Rainy trip): Backyard in light rain, flat grey afternoon light, wet grass and puddles on the patio stones. The owner holds a dark umbrella over the puppy, only the arm and handle visible. The puppy sniffs quickly, squats on the grass and runs back toward the open back door. Sound: rain tapping on the umbrella, quick paws, owner laughs "fastest one yet". 20-25s (Last trip of night): Backyard at night, ordinary yellow porch light, dark grass and a wooden fence fading into shadow. The puppy finishes sniffing, then gallops back to the porch steps with her oversized paws flopping and hops up the step toward the open door and the warm kitchen. Sound: crickets, tiny paws on the step, owner says "bedtime, baby".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Early trip out

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
