Puppy Learning to Sit

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The puppy learns to sit over one day: the first lure with a treat, sitting for her dinner bowl, a distracted try on the grass, a sit at the front door and a sit that tips over into a belly rub.

TIMELINE

0-5s	First lure
5-10s	Sit for dinner
10-15s	Distracted on grass
15-20s	Sit at the door
20-25s	Sit tips over

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 9-week-old female solid black German Shepherd puppy with fluffy all-black fur, oversized paws and floppy ears that are just starting to stand, wearing a small green collar. 0-5s (First lure): Living room, morning daylight, worn brown carpet. The owner kneels, only arms and knees visible, holding a small treat just above the puppy's nose and moving it slowly back. Her head goes up, her bottom slowly lowers to the carpet, and she gets the treat. Sound: owner says "sit... yes!", tiny crunch, tags jingling. 5-10s (Sit for dinner): Kitchen, late afternoon daylight, beige tile floor. The owner's hand holds a small steel bowl of kibble at waist height. The puppy bounces at first, then sits, wobbling a little. The bowl is lowered to the floor and she dives in right away. Sound: kibble rattling, owner says "sit", then "okay", eager crunching. 10-15s (Distracted on grass): Backyard, midday, overcast daylight, patchy grass, fallen leaves near the fence. The owner holds up a treat and says sit. The puppy starts to sit, then a leaf blows past and she pounces on it instead, then comes back and sits properly for the treat. Sound: wind, rustling leaves, owner laughs "almost". 15-20s (Sit at the door): Front hallway, afternoon daylight from a small window, grey tile floor, shoes lined up by the wall. The puppy wears a small red leash and sits by the front door, looking up at the owner with her ears half up, waiting for the door to open. Sound: leash clip jingle, owner says "good sit, now we go", door handle clicking. 20-25s (Sit tips over): Living room in the evening, ordinary lamp light, grey couch, brown carpet. The puppy sits for a treat, then slowly tips over onto her side and rolls onto her back. The owner's hand rubs her round fluffy belly while her paws paddle in the air. Sound: soft carpet sounds, owner laughs "that's not a sit", tiny grunts.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | First lure

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
