Daily Life at Five Months Old

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

An ordinary day with a lanky five-month-old: hallway zoomies, teething on a chew, a clumsy sidewalk walk, practicing down on a mat and an evening flop with one floppy ear.

TIMELINE

0-5s	Hallway zoomies
5-10s	Teething chew
10-15s	Clumsy walk
15-20s	Down on the mat
20-25s	Evening flop

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 5-month-old female solid black German Shepherd, lanky with long legs and oversized ears, one ear still slightly floppy, short all-black coat, wearing a green nylon collar. 0-5s (Hallway zoomies): Long hallway in a house, early morning, grey daylight from a window at the end, laminate floor with a runner rug. The young dog races down the hallway, long legs flying, the rug bunching under her paws, then spins around at the end and races back past the camera. Sound: thumping paws, sliding rug, owner says "good morning to you too". 5-10s (Teething chew): Living room, mid-morning daylight, grey couch, worn brown carpet. The young dog lies on the carpet holding a thick nylon chew bone between her big front paws, gnawing on it with her back teeth, eyes half closed. Her floppy ear tips over as she shifts her head. Sound: steady gnawing, a clock ticking, birds outside. 10-15s (Clumsy walk): Quiet neighborhood sidewalk, late morning, overcast daylight, cracked concrete, parked cars and small front lawns. The young dog walks on a blue leash, trots ahead, trips over her own front paw, recovers and keeps going, ears bouncing and tail up. Sound: traffic far away, leash jingling, owner laughs "those legs". 15-20s (Down on the mat): Kitchen, afternoon daylight, beige tile floor, a small grey rubber mat. The owner's hand lowers a treat to the floor. The young dog folds her long legs awkwardly, sliding into a down on the mat, and gets the treat, then pops right back up. Sound: owner says "down... good!", crunch, claws tapping on tile. 20-25s (Evening flop): Living room in the evening, ordinary lamp light, a large tan dog bed by the couch. The young dog walks over, turns once and flops down with all four long legs sticking out, her floppy ear folded over her eye. She lets out a long sigh and closes her eyes. Sound: soft thud, long sigh, TV murmuring.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Hallway zoomies

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
