First Night Sleeping in the Van

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The first night in the van: settling in by lamplight, listening to night sounds, sneaking onto the bed, curling up at her feet and waking up still there.

TIMELINE

0-5s	Settling in
5-10s	Night listening
10-15s	Sneaks onto bed
15-20s	Curled at feet
20-25s	Morning check

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Settling in): Inside the sage green camper van at night, a small warm battery lantern on the counter lighting light wood cabinets, dark windows. The dog turns around three times on his grey foam bed on the floor, lies down, then lifts his head again, ears up. Sound: quiet van, bed rustling, owner whispers "it's okay". 5-10s (Night listening): Same van interior at night, lantern light, curtains drawn over the windows. The dog lies on his bed with his head raised, ears turning toward the side door at a sound outside. He holds still for a moment, then slowly lowers his chin onto his paws. Sound: an owl hooting outside, crickets, a soft huff. 10-15s (Sneaks onto bed): Van interior at night, dim lantern light, a raised bed with a grey sleeping bag at the back. Point of view from the bed. The dog carefully puts his front paws up on the mattress, pauses, looks at the camera, then climbs up the rest of the way. Sound: mattress creaking, owner laughing softly "really?". 15-20s (Curled at feet): Raised bed in the sage green camper van at night, lantern turned low, grey sleeping bag over the owner's legs. The dog curls into a tight white ball at the foot of the bed, tail over his nose, eyes slowly closing while the owner's hand pats his side. Sound: crickets outside, deep doggy sigh, quiet breathing. 20-25s (Morning check): Same van at dawn, pale grey light through the curtains, lantern off. Point of view from the pillow. The dog is still on the foot of the bed, stretched out on his side, and lifts his head sleepily to look at the camera, then thumps his tail on the sleeping bag. Sound: morning birds, tail thumping, owner whispers "good morning".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Settling in

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
