Roadside Wildflower Break

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A spring stop by a field of wildflowers: walking the field edge, sniffing flowers, a bee he carefully ignores, a sit for a photo and a roll in the soft grass.

TIMELINE

0-5s	Field edge walk
5-10s	Sniffs flowers
10-15s	Ignores a bee
15-20s	Photo sit
20-25s	Grass roll

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Field edge walk): Wide grassy shoulder beside a quiet country road, bright spring morning with a few clouds, a field of yellow and purple wildflowers stretching away. The dog walks on a loose leash along the edge of the field, well away from the road, tail up, nose low. Sound: birds, wind in the grass, leash jingling. 5-10s (Sniffs flowers): Same wildflower field, clear spring daylight. The dog stops and pushes his nose into a clump of small purple flowers, sniffing deeply, a bit of yellow pollen dusting his white muzzle. He sneezes once and then keeps sniffing. The owner's hand on the leash stays relaxed and loose. Sound: buzzing insects, sniffing, a sneeze, owner laughs. 10-15s (Ignores a bee): Close view at the field edge, bright daylight, yellow flowers swaying. A single bee hovers near a flower close to the dog's nose. The dog pulls his head back slightly, watches it for a second and then calmly turns away to sniff the grass instead. Sound: bee buzzing, breeze, owner says "leave it, good choice". 15-20s (Photo sit): Middle of a path through the wildflowers, soft morning daylight, flowers up to his chest. The dog sits when asked and looks right at the camera, ears up, mouth open and panting a little, flowers moving around him in the breeze. Sound: breeze, owner says "sit, look here, good". 20-25s (Grass roll): Patch of short soft green grass beside the flower field, bright spring daylight, the sage green camper van with no writing or logos parked in the background on the shoulder. The dog flops onto his back and wiggles side to side, legs in the air. Sound: grass rustling, happy grunts, owner laughing.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Field edge walk

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
