Van Life Dinner Time

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Dinner at camp: he waits politely while the stove stays out of reach, gets his own bowl, licks it clean, gets a raw carrot treat and lies by her camp chair while she eats.

TIMELINE

0-5s	Polite wait
5-10s	His own bowl
10-15s	Licks it clean
15-20s	Carrot treat
20-25s	By her chair

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Polite wait): Dirt campsite at dusk, soft fading daylight, pine trees around, a small camp stove on a folding table by the sage green camper van. The dog lies on a mat a few meters away from the table on a long tether, watching the owner's hands stir a pot. Sound: stove hissing, pot clinking, owner says "yours is next". 5-10s (His own bowl): Same campsite at dusk, a battery lantern switched on beside the van door. The owner's hand sets a steel bowl of kibble on the ground in front of the dog. He sits, waits for a nod, then dives in eagerly. Sound: bowl on dirt, kibble crunching, crickets. 10-15s (Licks it clean): Close view of the steel bowl on the dirt by the van, lantern light and the last blue light of evening. The dog pushes the empty bowl around with his tongue, licking every spot, the bowl sliding across the ground and clinking against a rock. Sound: metal bowl scraping, licking, owner laughs "it's empty". 15-20s (Carrot treat): Campsite in the early evening, lantern light, owner sitting in a green camp chair. Her hand offers the dog a raw baby carrot. He takes it gently, lies down beside the chair and crunches it loudly, holding it between his paws. Sound: loud carrot crunching, crickets, owner says "gentle, good". 20-25s (By her chair): Campsite in evening twilight, the camp stove turned off on the table, lantern light. The dog lies stretched out beside the green camp chair, head on the owner's boot, while she eats from a bowl above him. He doesn't beg, just rests. Sound: spoon clinking, crickets, a contented sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Polite wait

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
