Driving Through the Mountain Pass

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A day crossing a mountain pass: harnessed in the back watching the views, a cold stop at a safe overlook parking area, sniffing the snowbank, a drink and a sleepy ride down.

TIMELINE

0-5s	Window watching
5-10s	Overlook parking
10-15s	Snowbank sniff
15-20s	Cold drink
20-25s	Sleepy descent

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Window watching): Back of the sage green camper van while driving up a winding mountain road, bright cloudy daylight, pine forest and rocky peaks outside the window. The dog sits on a padded bench clipped into a seat-belt tether on his harness, nose close to the closed window, watching. Sound: engine working uphill, road noise, owner says "almost at the top". 5-10s (Overlook parking): Wide paved parking area at the top of a mountain pass, cold bright daylight, snowy peaks far behind a low stone wall. The dog on a short leash steps out of the van and stands beside the owner's hiking boots in the middle of the lot, far from the wall, sniffing the cold air. Sound: strong cold wind, a car door closing, leash jingling. 10-15s (Snowbank sniff): Edge of the parking area beside a dirty old snowbank, overcast mountain light, patches of gravel. The dog pushes his nose into the snow, snorts, then takes a bite of snow and chews it, white fur blowing in the wind. Sound: wind, crunching snow, a snort, owner laughs. 15-20s (Cold drink): Beside the open van side door at the mountain pass parking area, cool daylight. The owner's hand holds a collapsible bowl of water low and the dog drinks, a few drops landing on the cold asphalt, his breath faintly visible in the air. Sound: lapping water, wind gusts, owner says "good boy". 20-25s (Sleepy descent): Back of the camper van driving downhill through a pine forest, soft afternoon light through the trees. The dog lies on his grey bed on the floor, still clipped into his harness tether, eyes closing as the van gently sways around the curves. Sound: engine braking, road hum, quiet snoring.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Window watching

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
