Leaving Before Dawn

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

An early start in the dark: sleepy wake-up, a headlamp potty walk, stowing his bed, clipping into his harness tether and falling asleep as the sky turns light.

TIMELINE

0-5s	Sleepy wake-up
5-10s	Headlamp walk
10-15s	Stowing his bed
15-20s	Clipping in
20-25s	Dawn sleep

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Sleepy wake-up): Inside the sage green camper van in the dark, only a small red night light on, dark windows. The dog lies curled on his bed and slowly lifts his head as the owner's hand touches his back, blinking, not wanting to get up. Sound: quiet van, a sleepy groan, owner whispers "time to go". 5-10s (Headlamp walk): Dark campsite before dawn, deep blue sky, a white headlamp beam lighting a small patch of gravel and grass. The dog walks on leash in the beam, sniffing slowly, his white fur bright in the light. The sage green camper van is a dark shape behind them, with a small lamp on inside. Sound: crickets, gravel crunching, owner yawning. 10-15s (Stowing his bed): Inside the camper van, small warm lamp on, dark outside. The owner's hands fold a grey blanket and push it into a cubby. The dog stands right next to his foam bed, watching, then lies back down on it anyway. Sound: blanket rustling, owner laughing softly "hey, not yet". 15-20s (Clipping in): Back bench of the sage green camper van, dim lamp light, dark windows. The owner's hands clip a seat-belt tether onto the back of the dog's grey harness as he sits on the padded bench, ears down, sleepy. He gives one big yawn and settles down onto the bench. Sound: buckle clicking, owner says "good boy, all set". 20-25s (Dawn sleep): Back of the camper van while driving on an empty highway, pale blue dawn light starting in the windows, flat fields outside. The dog lies on the bench still clipped in, head on his paws, eyes closed, gently swaying. The owner's hand reaches back briefly to pat his side. Sound: engine hum, road noise, soft snoring.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Sleepy wake-up

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
