Long Drive Day Breaks

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A long driving day broken into stops: a grassy rest area sniff, a stretch walk, a quick game of fetch, a snack break and back into his harness for the next leg.

TIMELINE

0-5s	Grassy sniff
5-10s	Stretch walk
10-15s	Quick fetch
15-20s	Snack break
20-25s	Next leg

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Grassy sniff): Grassy area at a quiet highway rest stop, bright midday daylight, picnic tables and shade trees, no signs in view. The dog walks on a leash across the patchy grass, nose down, tail wagging, the sage green camper van parked in the lot behind. Sound: distant highway traffic, birds, sniffing. 5-10s (Stretch walk): Wide paved path around the rest stop lawn, sunny daylight. The dog walks beside the owner's sneakers on a loose leash, then stops to do a long front stretch, yawning loudly with his tongue curling. His harness sits a little crooked from the long ride. Sound: traffic far away, a big squeaky yawn, owner laughs. 10-15s (Quick fetch): Open lawn at the rest stop away from the parking lot, bright daylight, short green grass. The owner's hand throws a worn orange rubber ball a short distance. The dog sprints after it on a long line, grabs it and trots back proudly. Sound: ball bouncing, pounding paws, owner says "good catch". 15-20s (Snack break): Shade under a big tree beside a picnic table at the rest stop, dappled daylight. The owner's hand gives the dog a small dog biscuit while a collapsible water bowl sits on the grass. He crunches the biscuit and then drinks. Sound: biscuit crunching, lapping, leaves rustling. 20-25s (Next leg): Open side door of the sage green camper van in the rest stop parking lot, afternoon daylight. The dog jumps onto the padded back bench and sits while the owner's hands clip his harness tether. He lies down, ready to ride. Sound: buckle clicking, door sliding shut, owner says "three more hours".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Grassy sniff

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
