Evening Camp Chair Chill

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

An easy evening outside the van: setting up the chairs, him getting his own blanket, a chew while she reads, watching the sun go down and leaning in for head scratches.

TIMELINE

0-5s	Chair setup
5-10s	His blanket
10-15s	Chew time
15-20s	Sunset watch
20-25s	Head scratches

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Chair setup): Grassy campsite beside a lake, warm evening light, the sage green camper van parked behind. The owner's hands unfold a green camp chair. The dog walks in circles around the chair, sniffing it, tail wagging. The calm grey-blue lake lies quiet beyond the trees, and a second folded chair leans against the van. Sound: chair clicking open, birds, owner says "okay, relax time". 5-10s (His blanket): Same lakeside campsite, evening daylight. The owner's hand spreads a faded red blanket on the grass next to the chair. The dog immediately lies down on it, rolls once onto his back and then settles on his side. The owner's hand gives him a pat on the side. Sound: blanket rustling, a happy grunt, birds. 10-15s (Chew time): Lakeside campsite at early evening, soft warm light. The owner sits in the camp chair with an open paperback on her knee, cover facing away. The dog lies on his blanket chewing a natural antler chew held between his paws. Sound: chewing, a page turning, lake water lapping. 15-20s (Sunset watch): Lakeside campsite at sunset, soft pink and orange sky over the calm lake. The dog sits on his blanket next to the camp chair, facing the water, ears relaxed, the owner's hand resting on his back. No campfire is lit nearby, only quiet evening light. Sound: loons calling far away, crickets, quiet water. 20-25s (Head scratches): Campsite at dusk, dim blue light, a small lantern on the ground by the van. The dog rests his chin on the arm of the camp chair and leans in as the owner's hand scratches behind his ears, eyes half closed. Sound: crickets, owner says softly "best seat in the house".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Chair setup

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
