Volcano Crater Rim Hike

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A morning hike up a wide cinder trail to an old volcano rim: leaving the van, climbing the black gravel path, sitting well back at the rim viewpoint, a snack break and the walk down.

TIMELINE

0-5s	Ready at trailhead
5-10s	Climbing cinder path
10-15s	Rim viewpoint
15-20s	Snack break
20-25s	Heading down

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Ready at trailhead): Gravel parking area at the foot of a dark volcanic slope, cool overcast early morning. The sage green camper van with no logos is parked behind. The owner, a woman with a long auburn braid in a green rain jacket, is shown only by her hands clipping a leash to the dog's harness. The dog shakes his coat and looks up the trail. Sound: wind, gravel crunching, a car door closing, owner says "ready, buddy?". 5-10s (Climbing cinder path): A wide trail of black and rust-red cinder gravel zigzags up a bare volcanic slope under low grey clouds, flat natural daylight. The dog walks a few steps ahead on a loose leash, paws crunching in the loose gravel, while the owner's hiking boots appear at the bottom of the frame. Small puffs of dark dust rise behind him. Sound: crunching cinder, steady panting, wind gusts. 10-15s (Rim viewpoint): A broad flat section of the crater rim trail, cloudy daylight, wind moving the sparse grass. The dog sits on his leash right beside the owner's boots, well back from the edge, with the wide crater floor visible far below and behind him. He sniffs the breeze, ears turning, while the camera holds steady. Sound: strong wind, the dog's tags jingling, owner says "look at that". 15-20s (Snack break): On the wide rim trail, the owner sits on a flat dark lava rock in the middle of the path, her auburn braid blowing in the wind, cool overcast light. Her hand offers the dog a small treat and he takes it gently, then licks his lips and leans against her knee, the grey slopes stretching out behind him. Sound: wind, a soft crunch, owner laughing "gentle". 20-25s (Heading down): The same wide black cinder path heading downhill, the clouds breaking a little and soft daylight spreading over the slope. The dog trots down ahead on a loose leash, gravel sliding under his paws, and the small sage green camper van is visible in the parking area far below at the end of the trail. Sound: crunching gravel, footsteps, a happy huff, distant wind.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Ready at trailhead

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. Gravel parking area at the foot of a dark volcanic slope, cool overcast early morning. The sage green camper van with no logos is parked behind. The owner, a woman with a long auburn braid in a green rain jacket, is shown only by her hands clipping a leash to the dog's harness. The dog shakes his coat and looks up the trail. Sound: wind, gravel crunching, a car door closing, owner says "ready, buddy?".

Clip 2 | 5-10s | Climbing cinder path

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. Sound: crunching gravel, footsteps, a happy huff, distant wind.

FACEBOOK CAPTION

Climbed an old volcano before breakfast.
He was more excited about the snack than the view.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
