Walking Among the Giant Redwoods

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A misty morning in a giant redwood forest: walking the soft trail, standing tiny next to a huge trunk, stepping through a hollow log, brushing through ferns and a rest on a bench.

TIMELINE

0-5s	Forest trail
5-10s	Giant trunk
10-15s	Hollow log
15-20s	Through ferns
20-25s	Bench rest

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Forest trail): A soft trail covered in brown needles winding between enormous reddish redwood trunks, misty grey morning light filtering down between the trees. The dog walks ahead on a loose leash, sniffing the damp ground, and the owner's boots step into the bottom of the frame on the quiet path. Sound: birdsong, quiet footsteps on needles, dripping branches. 5-10s (Giant trunk): Beside the trail, misty daylight. The dog stands next to a massive redwood trunk with deep furrowed bark, sniffing its base. The camera slowly tilts up the huge trunk into the mist and back down to the dog, who looks tiny beside it and wags his tail. Sound: soft wind high in the trees, owner says "you look so small". 10-15s (Hollow log): A huge fallen redwood log lies beside the trail with a wide, clear hollow opening through its middle, soft grey forest light. The dog walks through the opening from one end to the other, sniffing the dry wood inside, and comes out toward the camera wagging. Sound: paws on dry wood, echoing sniffing, owner says "come here". 15-20s (Through ferns): Tall green sword ferns crowd both sides of the needle trail, misty morning light and damp air. The dog pushes along the edge of the ferns on his leash, wet fronds brushing over his white back, then shakes his head and keeps trotting forward. Sound: ferns swishing, dripping water, panting. 20-25s (Bench rest): A simple wooden bench beside the trail between two giant trunks, soft misty daylight. The owner, a woman with a long auburn braid in a green rain jacket, sits on the bench and the dog rests his chin on her knee, eyes half closed, while her hand strokes his ears. Sound: quiet forest, a woodpecker far away, a contented sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Forest trail

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
