Giant Sand Dune Climb

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A cool morning climb up a giant sand dune: starting at the base, a slow plod up the soft ridge, a panting sit at the top, a water break and a bouncy run back down.

TIMELINE

0-5s	Base of dune
5-10s	Climbing ridge
10-15s	Top of dune
15-20s	Water break
20-25s	Run down

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Base of dune): The base of a huge tan sand dune in cool early morning light, long soft shadows on the sand. The dog stands on his leash at the bottom looking up the long slope, tail wagging, while the owner's boots sink slightly into the sand beside him. Sound: light wind, sand hissing, owner says "ready?". 5-10s (Climbing ridge): Halfway up the dune along its soft sandy ridge, cool morning daylight. The dog plods upward on a loose leash, paws sinking and sand sliding behind him, while the owner's boots struggle behind in the bottom of the frame. The dune crest is still far above them. Sound: heavy breathing, sand sliding, owner laughing "this is hard". 10-15s (Top of dune): The wide rounded top of the giant dune, cool morning light, more rolling tan dunes stretching away under a pale sky. The dog sits in the sand on his leash, panting with his tongue out, and looks out over the dunes. Sound: wind, panting, owner says "we made it". 15-20s (Water break): On top of the dune, cool breeze and soft morning daylight. The owner, a woman with a long auburn braid, kneels and her hand holds a blue collapsible bowl while she pours water from a bottle. The dog drinks noisily, sand stuck to his chin. Sound: pouring water, lapping, wind. 20-25s (Run down): The soft sandy slope of the dune, morning light. The dog bounds down the gentle side in big happy leaps beside the owner on his leash, sand spraying from his paws, and stops at the bottom with a big shake. Sound: thumping paws in sand, laughter, a shake.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Base of dune

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
