Watching Bison From the Van

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A cool morning watching a bison herd from inside the parked van: settling in by the window, the herd grazing far away, sniffing the air through the gap, a bison dust bath and a calm rest.

TIMELINE

0-5s	Settling in
5-10s	Herd far away
10-15s	Sniffing the air
15-20s	Dust bath
20-25s	Calm rest

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Settling in): Inside the parked sage green camper van in a roadside pullout, cool cloudy morning light through the windows, engine off. The dog sits on the bench seat behind the front seats beside a side window rolled partly down, looking out at rolling grassland. Sound: quiet van, wind outside, owner whispers "look out there". 5-10s (Herd far away): Point of view through the partly open van window, cool morning daylight. Far away on rolling golden grass hills, a herd of dark brown bison grazes slowly, small shapes across the grassland. The edge of the window frame shows at the side. Sound: wind through grass, a low grunt far away. 10-15s (Sniffing the air): Inside the van by the side window, soft grey morning light. The dog pushes his nose to the gap at the top of the partly lowered window and sniffs the air, ears up and focused, staying quiet and calm on the seat. Sound: sniffing, wind, distant grunts. 15-20s (Dust bath): Zoomed through the van window, cloudy daylight. Far away, one bison rolls on its back in a patch of dust, legs kicking, a small brown cloud rising. Inside, the dog tilts his head at the sight while the owner's hand rests on his back. Sound: faint grunting, owner whispering "he is taking a dust bath". 20-25s (Calm rest): Inside the van, cool morning light, window still partly down. The owner, a woman with a long auburn braid in a green rain jacket, sets a steel water bowl on the van floor. The dog drinks, then lies down on the bench seat with his chin on the window ledge. Sound: lapping water, a sigh, wind outside.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Settling in

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
