Watching the Northern Lights

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A calm cold night by the van watching the northern lights: stepping out in his warm coat, sitting by her chair, green lights rippling over the pines, a quiet head scratch and curling up back inside.

TIMELINE

0-5s	Stepping out
5-10s	Sitting by chair
10-15s	Lights overhead
15-20s	Quiet head scratch
20-25s	Curling up inside

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Stepping out): Night beside a snowy lakeshore, calm and cold, the open side door of the sage green camper van spilling ordinary warm light from a small interior lamp onto the snow. The dog in a thick red dog coat steps down into the snow and sniffs the frosty air. Sound: crunching snow, quiet night, door sliding. 5-10s (Sitting by chair): A folding camp chair set on packed snow near the van, dark calm night with stars overhead, faint light from the van's open door. The owner, a woman with a long auburn braid under a wool hat, sits down and the dog in his red coat sits close beside her legs. Sound: chair creaking, snow crunching, owner whispers "stay close". 10-15s (Lights overhead): Dark night sky above a line of black pine trees and a frozen lake, calm and still. Soft green lights ripple across the sky in slow waves. The dog sits in his red coat in the snow in the foreground and lifts his head toward the sky. Sound: total quiet, the owner's soft gasp, "look at that". 15-20s (Quiet head scratch): Same snowy night by the lake, green lights moving across the dark sky above the pines. The owner's gloved hand gently scratches behind the dog's ear as he leans against her knee in his warm red coat, his breath showing in the cold air. Sound: quiet night, a soft sigh, owner whispers "best night ever". 20-25s (Curling up inside): Inside the van at night, lit by an ordinary small warm lamp, wooden cabinets and a bed with a plaid blanket. The owner's hands unbuckle the dog's red coat, then he curls up on the blanket with a big sigh and closes his eyes. Sound: buckles clicking, a big sigh, door sliding shut.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Stepping out

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
