Visiting a Show Cave Entrance

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A cool overcast morning at a show cave entrance: walking the wooded path, sniffing the cool air at the cave mouth, a head tilt at the echo on the lit path, a sit by the handrail and back out into daylight.

TIMELINE

0-5s	Wooded path
5-10s	Cave mouth
10-15s	Echo head tilt
15-20s	Sit by handrail
20-25s	Back to daylight

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Wooded path): A wide paved path through green woods leading toward a rocky hillside, cool overcast morning light. The dog walks ahead on a short leash, sniffing the edges of the path, while the owner's boots and the hem of her green rain jacket appear behind. Sound: birds, footsteps on pavement, rustling leaves. 5-10s (Cave mouth): A wide rocky cave mouth with a paved path and metal handrails leading inside, simple electric lamps lighting the path, daylight outside. The dog stops at the entrance and lifts his nose, sniffing the cool damp air flowing out of the cave. Sound: dripping water, cool air moving, sniffing. 10-15s (Echo head tilt): Just inside the cave entrance on the lit paved path with handrails, warm electric lamps on the rock walls, daylight behind. The owner softly says hello and it echoes, and the dog tilts his head from side to side, ears up. Sound: owner says "hello" with an echo, dripping water. 15-20s (Sit by handrail): On the lit entrance path beside a metal handrail, damp rock walls and simple electric lamps, cool air. The dog sits calmly on his leash facing the camera, the bright cave opening behind him. The owner's hand reaches in and strokes his head. Sound: dripping water, owner says "this is as far as we go". 20-25s (Back to daylight): Walking back out of the cave mouth onto the paved path, overcast morning daylight and green trees outside. The dog trots out into the open air, does a full body shake, and wags at the camera, then sniffs the damp grass beside the path while the owner's hand loosens the leash. Sound: birds, a shake, footsteps, owner laughs.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Wooded path

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. FACEBOOK CAPTION

He got as far as the entrance and that was plenty.
The echo blew his mind.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
