Tea Plantation Hills Walk

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A misty morning walk through rolling tea plantation hills: the wide path between green rows, sniffing tea leaves, a hilltop sit, a rest in a wooden shelter and a drizzly walk back to the van.

TIMELINE

0-5s	Between tea rows
5-10s	Sniffing leaves
10-15s	Hilltop sit
15-20s	Shelter rest
20-25s	Drizzly walk back

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Between tea rows): A wide dirt path between neat rounded rows of bright green tea bushes on rolling hills, soft misty morning light. The dog walks ahead on a loose leash, sniffing the air, while the owner's boots step into the bottom of the frame. Sound: birds, quiet breeze, footsteps on dirt. 5-10s (Sniffing leaves): Beside the wide path, cool misty daylight. The dog stops at the edge of a tea bush and sniffs the small shiny green leaves with great interest, his nose disappearing into the bush, then pulls back with a dewdrop on his muzzle. Sound: rustling leaves, sniffing, owner laughs. 10-15s (Hilltop sit): The top of a rounded hill, soft misty light. Rows of tea bushes curve over the hills in every direction, fading into the mist. The dog sits on the path on his leash facing the camera, ears up, a little damp from the mist. Sound: breeze, birds, owner says "look at all this green". 15-20s (Shelter rest): A small open wooden shelter at the edge of the tea rows, cool grey daylight. The owner, a woman with a long auburn braid in a green rain jacket, sits on the bench holding a steel thermos cup, and the dog lies on the wooden floor at her feet. Sound: light rain starting on the roof, a sip, a sigh. 20-25s (Drizzly walk back): The wide path winding down between the tea rows in a light drizzle, flat grey light. The dog trots ahead on his leash toward a small roadside pull-off where the sage green camper van with no logos is parked, its side door already open and a towel waiting on the seat. Sound: light rain, footsteps, panting.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Between tea rows

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
