We Made It to the Summit

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A full summit day on a wide mountain trail: a frosty dawn start at the van, the switchback climb, a water break on the rocks, the broad flat summit and a shady rest on the way down.

TIMELINE

0-5s	Dawn start
5-10s	Switchback climb
10-15s	Water break
15-20s	On the summit
20-25s	Rest on the descent

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Dawn start): Gravel trailhead parking area just before sunrise, cold blue dawn light, thin frost on the gravel. The sage green camper van with no writing sits with its side door open. The owner, a woman with a long auburn braid in a green rain jacket, clips a leash to the dog's harness while he stands by the door, tail swinging, breath steaming. Sound: gravel crunching, van door sliding, owner whispers "ready for the big one?". 5-10s (Switchback climb): Wide rocky switchback trail on an open mountainside, early morning daylight, low shrubs and scattered boulders. The camera follows from behind as the dog walks steadily uphill on a loose leash a few steps ahead, placing his paws carefully on the loose stones, ears up, tail relaxed. The trail is broad and well away from any drop. Sound: boots on loose stones, steady panting, wind in the shrubs. 10-15s (Water break): Flat granite slab beside the wide trail, bright mid-morning sun, a few thin clouds. The owner's hands pour water from a metal bottle into a collapsible blue silicone bowl set on the rock. The dog laps quickly, drops flying from his muzzle, then lifts his head and pants while looking further up the trail. Sound: water splashing into the bowl, loud lapping, owner says "almost there". 15-20s (On the summit): Broad flat grassy summit with a small pile of stacked stones in the middle, windy late morning, clear sky, hazy ridges all around in the distance. The dog sits calmly beside the stone pile in the center of the wide plateau, fur ruffled by the wind, while the owner's arm reaches in to scratch his chest. Nowhere near any edge. Sound: strong wind rumbling on the phone mic, owner laughs "we did it, buddy". 20-25s (Rest on the descent): Shady spot under a twisted pine beside the wide trail heading down, early afternoon dappled sunlight, dry needles on the ground. The dog lies flat on his side on the needles, tongue out and panting, while the owner's dusty hiking boots stretch out next to him. He thumps his tail twice when her hand pats his ribs. Sound: soft panting, a bird calling, tail thumping on dry needles.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Dawn start

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
