His First Ride in the Bike Trailer

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A bike day with the dog riding in a proper enclosed dog bike trailer on a quiet flat path: climbing in, rolling out, watching ducks, a stretch break and a shady rest.

TIMELINE

0-5s	Climbing in
5-10s	Rolling out
10-15s	Watching ducks
15-20s	Stretch break
20-25s	Shady rest

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Climbing in): Grassy park beside a quiet flat paved path, bright morning sun, a bicycle with an enclosed dog bike trailer attached, grey fabric with mesh windows. The owner's hand holds the front flap open and pats the padded floor. The dog steps in, turns once and lies down, and her hand zips the mesh closed with his harness clipped inside. Sound: birds, zipper sliding, owner says "good boy, comfy?". 5-10s (Rolling out): Quiet flat paved path along a green field, sunny morning, no traffic. The phone is clipped to the handlebar facing back toward the enclosed trailer. Through the mesh window the dog sits upright, ears forward, nose lifted into the breeze, watching the field roll past as the trailer follows smoothly behind. Sound: tires humming on pavement, soft breeze, bike chain ticking. 10-15s (Watching ducks): Same flat path passing a calm pond with reeds, sunny late morning. The trailer is stopped at the side of the path. Through the mesh the dog watches a few ducks paddling far out on the water, ears perked and head tilted, sitting quietly inside the trailer with his tail moving slowly. Sound: ducks quacking in the distance, reeds rustling, owner whispers "see them?". 15-20s (Stretch break): Grassy verge next to the flat path, bright midday sun, a wooden fence and wildflowers. The trailer flap is open and the dog steps out on leash, stretches long with his front legs out and rear in the air, shakes his whole body, then sniffs along the fence line with his tail up. Sound: zipper, a big shake, collar tags jingling, grasshoppers. 20-25s (Shady rest): Wooden park bench under a big oak tree beside the path, midday dappled shade. The owner's legs in cycling shorts are on the bench and the dog lies in the cool grass at her feet, drinking from a collapsible bowl, then resting his chin on her sneaker with a contented sigh. The bike and trailer stand nearby. Sound: lapping water, leaves rustling, a distant bicycle bell.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Climbing in

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. Grassy park beside a quiet flat paved path, bright morning sun, a bicycle with an enclosed dog bike trailer attached, grey fabric with mesh windows. The owner's hand holds the front flap open and pats the padded floor. The dog steps in, turns once and lies down, and her hand zips the mesh closed with his harness clipped inside. Sound: birds, zipper sliding, owner says "good boy, comfy?".

Clip 2 | 5-10s | Rolling out

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
