Geocaching Treasure Hunt With My Nose Dog

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A geocaching walk in the woods: following the coordinates, searching around an old stump, finding the hidden box, peeking inside and hiding it back again.

TIMELINE

0-5s	Following the trail
5-10s	Searching the stump
10-15s	Found it
15-20s	Peek inside
20-25s	Hiding it back

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Following the trail): Leafy forest trail in early autumn, soft morning light, yellow leaves on the ground. The owner's hand holds a phone with the screen turned away from the camera. The dog walks ahead on a long leash with his nose low, zigzagging along the edge of the trail and stopping to sniff a mossy rock. Sound: leaves crunching, birds, owner says "it says close, buddy". 5-10s (Searching the stump): Small clearing off the trail, dappled morning sunlight, a large old hollow stump covered in moss. The dog circles the stump with his nose working hard, pushing it into the ferns around the base. He stops, sniffs one spot intensely and scrapes once with his front paw. Sound: snuffling, ferns rustling, owner whispers "did you find something?". 10-15s (Found it): Same mossy stump, morning light. The owner's hand pushes back the ferns at its base, revealing a small plain dark green plastic box with no writing on it. The dog pokes his nose right at the box and sniffs it, tail swinging, then looks up at the camera with his ears forward. Sound: ferns swishing, plastic tapping, owner laughs "you found it". 15-20s (Peek inside): Forest floor beside the stump, soft morning light, damp leaves. The plain green box sits open on the ground holding a few small plain trinkets and a little rolled paper. The dog lowers his head and sniffs inside carefully while the owner's hand rests on his back to keep him from grabbing anything. Sound: lid clicking open, sniffing, owner says "just looking". 20-25s (Hiding it back): Same stump in the clearing, sunlight breaking through the canopy. The owner's hand slides the closed green box back under the ferns at the base of the stump. The dog watches closely, then trots off along the leafy trail with his tail high, glancing back to make sure she is following. Sound: ferns rustling, leaves crunching, owner says "on to the next one".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Following the trail

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. Leafy forest trail in early autumn, soft morning light, yellow leaves on the ground. The owner's hand holds a phone with the screen turned away from the camera. The dog walks ahead on a long leash with his nose low, zigzagging along the edge of the trail and stopping to sniff a mossy rock. Sound: leaves crunching, birds, owner says "it says close, buddy".

Clip 2 | 5-10s | Searching the stump

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
