No Phone, Just a Map and a Compass

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

An orienteering walk with a paper map and compass: planning on the van hood, taking a bearing, crossing open woods, finding a checkpoint marker and a rest on a hilltop meadow.

TIMELINE

0-5s	Planning the route
5-10s	Taking a bearing
10-15s	Through the woods
15-20s	Checkpoint found
20-25s	Hilltop rest

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Planning the route): Gravel pullout beside the sage green camper van with no writing, cool breezy morning, patchy clouds. A paper map with only green and brown shapes and no readable words is spread on the van's hood under the owner's hands. The dog sits on the gravel beside the front tire, looking up at her with his head tilted and his tail sweeping. Sound: map crinkling in the wind, a passing breeze, tail swishing gravel. 5-10s (Taking a bearing): Edge of an open beech forest, breezy morning light, last year's brown leaves on the ground. A plain clear compass with no readable markings rests flat on the owner's open palm, the needle settling. The dog sits in front of her on the leaves, head tilted, watching her hand closely. Sound: wind in the branches, owner mutters "that way". 10-15s (Through the woods): Open beech forest with tall grey trunks and no undergrowth, soft daylight, thick layer of dry leaves. The dog walks ahead on a long leash, kicking through the leaves, nose low, then glances back over his shoulder at the owner as she follows the bearing between the trunks. Sound: deep leaf crunching, a woodpecker tapping, panting. 15-20s (Checkpoint found): Small dip in the beech forest beside a mossy boulder, midday daylight. A plain orange and white fabric flag hangs from a short wooden post with no writing. The dog reaches it first, sniffs the post all over and lifts his head, tail wagging, as the owner's hand pats his side. Sound: leaves rustling, owner cheers "checkpoint one". 20-25s (Hilltop rest): Grassy hilltop meadow above the forest, sunny early afternoon, a few clouds drifting. The owner sits in the grass with the folded map on her knee. The dog lies beside her, panting with his tongue out, then rolls onto his back in the grass for a belly scratch from her hand. Sound: wind over the grass, a skylark singing, happy grunts.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Planning the route

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. Gravel pullout beside the sage green camper van with no writing, cool breezy morning, patchy clouds. A paper map with only green and brown shapes and no readable words is spread on the van's hood under the owner's hands. The dog sits on the gravel beside the front tire, looking up at her with his head tilted and his tail sweeping. Sound: map crinkling in the wind, a passing breeze, tail swishing gravel.

Clip 2 | 5-10s | Taking a bearing

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
