Puppy's First Snow Hike

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A very short, flat first snow walk for the puppy: stepping out of the van into snow, bounding through it, sneezing at snowflakes, a paw warm-up and cozy time back in the van.

TIMELINE

0-5s	First step into snow
5-10s	Bounding through snow
10-15s	Snowflake sneeze
15-20s	Paw warm-up
20-25s	Cozy in the van

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 9-week-old male white German Shepherd puppy with fluffy pure white fur, black nose, oversized paws and floppy ears, wearing a small tan collar. 0-5s (First step into snow): Snowy pullout beside a pine forest, flat white winter daylight, the sage green camper van with no writing or logos parked with its side door open. The puppy stands at the door edge, then the owner's gloved hands set him down in shallow fresh snow. He freezes and looks at his paws. Sound: soft wind, crunching snow, owner says "it is cold, huh". 5-10s (Bounding through snow): Short flat snowy path between small pine trees, overcast winter light. The puppy hops forward through ankle-deep powder like a bunny, his fluffy white body almost blending with the snow, black nose and dark eyes standing out, little puffs of snow flying from his oversized paws. Sound: soft thumps in snow, panting, owner laughing. 10-15s (Snowflake sneeze): Same flat snowy path, light snowflakes falling, grey sky. The puppy sits in the snow and looks up as flakes land on his nose. He snaps at one, shakes his head so his floppy ears flap, then sneezes and pushes his face into the snow to sniff. Sound: quiet falling snow, tiny sneeze, owner says "bless you". 15-20s (Paw warm-up): Same snowy path beside a low pine branch, overcast winter daylight. The owner crouches and holds one of the puppy's oversized paws in her gloved hand, gently brushing small snow clumps from between his toes. He licks her glove and wiggles while she checks the next paw. Sound: soft brushing, puppy licking, owner says "warm toes check". 20-25s (Cozy in the van): Inside the parked sage green camper van, warm and dim, plain daylight from the side window showing falling snow outside. The puppy is curled on a red fleece blanket on the owner's lap, his white fur slightly damp, eyes closing while her hand rubs his chest. Sound: quiet van heater humming, puppy's sleepy grunts, snow ticking on the roof.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | First step into snow

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
