Trying His New Adventure Harness

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Testing a new adventure harness: sniffing it, getting it fitted, the first walk shake, using the handle over a log and the reflective strips at dusk.

TIMELINE

0-5s	Sniff inspection
5-10s	Fitting time
10-15s	First walk shake
15-20s	Handle over a log
20-25s	Reflective strips at dusk

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Sniff inspection): Inside the sage green camper van, plain daylight through the open side door. A new charcoal grey padded harness with a top handle lies on the van floor. The dog sniffs every buckle and strap carefully, then nudges it with his nose and looks up at the camera. Sound: sniffing, rustling straps, owner says "it is for you". 5-10s (Fitting time): Van floor, daylight from the door. The dog stands still while the owner's hands slide the new grey harness over his head and click the side buckle closed behind his front legs. She slips two fingers under a strap to check the fit as he licks her wrist. Sound: buckle clicking, dog licking, owner says "good, stand still". 10-15s (First walk shake): Wide gravel path beside a lake, bright overcast daylight. The dog takes a few stiff steps in the new harness, stops, and gives a huge full-body shake from head to tail. Then he trots on normally, tail up, his white coat fluffed out. Calm grey water and reeds stretch out behind him along the shore. Sound: big shake, jingling tags, owner laughs "approved". 15-20s (Handle over a log): Forest trail with a fallen log across it, dappled cloudy light. The owner's hand holds the top handle of the harness lightly as the dog hops up onto the log and down the other side, her hand steadying him without lifting. Moss covers the log and ferns grow along the trail edge. Sound: paws scraping bark, owner says "hop, nice". 20-25s (Reflective strips at dusk): Gravel campsite at dusk, nearly dark, the sage green camper van in the background. The owner's headlamp beam lands on the dog as he walks toward her, and the thin reflective strips on the harness flash bright silver against his white coat. A small lantern hangs from the van's open side door. Sound: crickets, footsteps on gravel, owner says "now I can see you".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Sniff inspection

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
