# Cooling Off in Every Stream

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

## VIDEO IDEA

A hot summer hiking day where he stops in every stream: a rocky creek, a sandy meadow creek, lying down in a forest stream, under a footbridge and dripping back on the trail.

## MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Rocky creek): Shallow rocky mountain creek crossing a wide trail, bright hot summer daylight, water barely ankle deep. The dog wades in up to his wrists, stands still with the cool water running around his legs, and sighs, tongue hanging out. Smooth grey stones line the creek bed under the clear water, and pine trees shade the far bank. Sound: rushing shallow water, cicadas, owner says "stop one". 5-10s (Sandy meadow creek): Slow, shallow creek with a sandy bottom winding through a sunny grassy meadow, bright summer daylight. The dog splashes through it in a few happy bounces, then stands in the middle sniffing the water while the owner waits on the bank. Tall summer grass and yellow wildflowers surround the creek, and the owner's dusty boots stand at the edge. Sound: splashing, grasshoppers, owner laughing "stop two". 10-15s (Lying down in the stream): Shady forest stream, calm and only a few inches deep, dappled summer light through leaves. The dog walks in, circles once and lies down flat in the cool water, only his head and back above the surface, looking very pleased. Ferns and mossy rocks line the edges of the water. Sound: gentle trickling water, birds, owner says "really, again?". 15-20s (Under the footbridge): Small wooden footbridge over a shallow clear stream, warm afternoon daylight. Filmed from on the bridge looking down, the dog stands in the shallow water under the edge, lapping at the surface and swishing his tail through the water. Smooth pebbles are visible under the clear water, and green leaves hang over the stream. Sound: water lapping, wooden planks creaking, owner says "stop four". 20-25s (Dripping on the trail): Dry dusty trail through pine trees, hot afternoon sun. The dog trots ahead of the camera completely soaked, his white coat dark and stuck to his body, water dripping onto the dust and leaving a trail of wet paw prints. Pine needles and small stones cover the trail around him. Sound: dripping, paws on dust, owner says "you are a sponge".

## AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

## CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

## HOW TO MAKE IT LOOK REAL

| | |
|---|---|
| **Use a real photo** | Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips. |
| **Muse AI: one video** | Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts. |
| **Pick the most natural** | Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face. |
| **Keep the real sound** | Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath. |
| **No filters** | Do not add filters, slow motion or fancy transitions - real home videos don't have them. |
