Finding the Best Stick on the Trail

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The serious search for the perfect trail stick: inspecting options, picking a huge branch, getting stuck between trees, trading it for a better one and carrying it proudly to the van.

TIMELINE

0-5s	Stick inspection
5-10s	Way too big
10-15s	Stuck between trees
15-20s	The trade
20-25s	Stick collection

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Stick inspection): Wide forest trail with fallen sticks along the side, soft overcast daylight. The dog walks slowly along the trail edge, sniffing one stick, nosing it aside, then sniffing the next one with total concentration, tail swishing behind him. Ferns and moss cover the ground between the tall trees, and pine needles carpet the path. Sound: crunching twigs, birds, owner says "very picky today". 5-10s (Way too big): Same forest trail, cloudy daylight. The dog grabs the middle of a long branch, almost twice his body length, and lifts it proudly. He trots forward with both ends dragging and wobbling, head held high. Pine needles and small twigs scatter behind the dragging branch as he goes, and his tail wags hard behind him. Sound: branch scraping the ground, owner laughing "that is a tree". 10-15s (Stuck between trees): Narrow gap between two tree trunks beside the trail, overcast light. The dog tries to walk through the gap with the long branch sideways in his mouth. Both ends hit the trunks and he stops short, then backs up and tries again. Ferns grow at the base of both trees. Sound: thunk of wood on bark, owner says "turn it, buddy". 15-20s (The trade): Open part of the trail, soft daylight. The dog drops the long branch, sniffs the ground, and picks up a perfect medium-sized stick instead. He trots back to the owner, tail wagging high, stick held neatly in the middle. Patches of moss and pine needles cover the dirt around them, and soft birdsong fills the woods. Sound: stick dropping, happy panting, owner says "good choice". 20-25s (Stick collection): Gravel lot beside the sage green camper van with no writing or logos, late afternoon daylight. The dog drops his stick next to the van's back tire, where a small pile of other sticks from earlier trails already lies, and looks up at the camera. His white coat is a little dusty from the trail. Sound: stick clatter, gravel, owner says "your collection is growing".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Stick inspection

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. Wide forest trail with fallen sticks along the side, soft overcast daylight. The dog walks slowly along the trail edge, sniffing one stick, nosing it aside, then sniffing the next one with total concentration, tail swishing behind him. Ferns and moss cover the ground between the tall trees, and pine needles carpet the path. Sound: crunching twigs, birds, owner says "very picky today".

Clip 2 | 5-10s | Way too big

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
