Rainy Trails Don't Stop Us

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A rainy day hike anyway: waiting by the van door, walking the wet forest, splashing in puddles, a break under a big tree and drying off in the van.

TIMELINE

0-5s	Ready by the door
5-10s	Wet forest walk
10-15s	Puddle splash
15-20s	Under the big tree
20-25s	Towel dry

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Ready by the door): Inside the sage green camper van, grey rainy daylight, raindrops running down the side window. The dog sits by the closed side door, staring at it, tail thumping on the floor, while the owner's hands zip up her green rain jacket. A wet dog towel hangs from a hook by the door. Sound: rain drumming on the van roof, zipper, owner says "yes, we are going". 5-10s (Wet forest walk): Forest trail in steady light rain, grey daylight, dark wet tree trunks and bright green moss. The dog trots ahead along the wide trail, his white coat speckled with raindrops, sniffing the wet leaves happily. Water drips from the low branches above the trail, and the owner's boots squelch through soft wet mud behind him with every step. Sound: rain on leaves, squishy footsteps, owner says "this is fine". 10-15s (Puddle splash): Same rainy forest trail, overcast and dim. The dog hops into a long shallow puddle across the path and trots through it, splashing water up around his legs, then stops in the middle and looks back at the camera. Rain ripples spread across the puddle surface, and wet ferns lean over the path on both sides. Sound: splashing, rain, owner laughing. 15-20s (Under the big tree): Under the wide branches of a huge old cedar tree beside the trail, rain falling around it, grey light. The owner's boots stand on dry needles. The dog steps in next to her and shakes off the rain from his head to his tail. Dry brown needles cover the ground under the tree. Sound: rain all around, big shake, owner says "break time". 20-25s (Towel dry): Inside the parked sage green camper van, dim rainy daylight through the windows. The dog stands on the floor while the owner's hands rub him with a big grey towel. When she lets go, his white fur sticks out in every direction. A pile of damp towels sits by the door. Sound: rain on the roof, towel rubbing, owner says "wet dog van again".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
