# The Adventure Never Ends

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

## VIDEO IDEA

Getting ready for the next trip together: packing the van, clipping in his safety tether, looking at the paper map, the first steps on a new trail and a quiet evening at the back doors.

## MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male white German Shepherd with a pure white thick medium-length coat, black nose, dark eyes, upright ears, strong athletic build, wearing a grey adventure harness over a tan leather collar, coat a little dusty from the trail. 0-5s (Packing the van): Driveway in front of a small house, bright morning daylight. The sage green camper van with no writing or logos has its back doors open. The owner's hands slide a camping box inside, and the dog jumps up into the back and sits in the middle of the gear. Sound: boxes thumping, birds, owner laughs "you are not luggage". 5-10s (Safety tether): Inside the back of the parked van, plain daylight through the windows. The dog sits on his padded bed while the owner's hands clip a short safety tether to the back of his grey harness. He licks her hand once she is done. Folded blankets and a water bowl sit beside his bed. Sound: metal clip clicking, tags jingling, owner says "ready to roll". 10-15s (Paper map): Inside the parked van at the small table, afternoon daylight from the window. A large paper map with blurry, unreadable lines is spread on the table. The dog rests his chin right on the middle of the map and looks up at the camera. A steaming mug sits at the corner of the table. Sound: paper rustling, owner says "there? okay, we go there". 15-20s (New trail): Start of an unfamiliar wide dirt trail through a pine forest, cool cloudy daylight. The dog trots forward eagerly, nose to the ground, tail high, sniffing everything new, while the owner's hiking boots follow behind him. Ferns line both sides of the path, and soft light falls between the pine trunks. A small wooden footbridge appears around the bend ahead. Sound: paws on pine needles, wind, owner says "new trail, new smells". 20-25s (Evening at the back doors): Quiet forest pullout at dusk, soft fading daylight, the sage green camper van with its back doors open. The owner sits on the back edge with her long auburn braid over her shoulder, and the dog lies beside her, his head on her lap. Pine trees stand dark around the small pullout. Sound: crickets, owner whispers "see you on the next trail".

## AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

## CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

### Clip 1 | 0-5s | Packing the van

#### HOW TO MAKE IT LOOK REAL

| | |
|---|---|
| **Use a real photo** | Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips. |
| **Muse AI: one video** | Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts. |
| **Pick the most natural** | Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face. |
| **Keep the real sound** | Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath. |
| **No filters** | Do not add filters, slow motion or fancy transitions - real home videos don't have them. |
