First Tiny Bark

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The three-week-old puppy finds his voice: waking up, a squeaky first try, a real tiny bark at a plush lamb, a check from mom and a proud nap.

TIMELINE

0-5s	Wakes up
5-10s	Squeaky try
10-15s	First bark
15-20s	Mom checks
20-25s	Proud nap

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 3-week-old male liver-and-tan German Shepherd puppy, tiny and round, eyes just open, short fuzzy chocolate-brown and tan fur, a brown nose, tiny folded ears, a thin light blue ribbon around his neck. 0-5s (Wakes up): Whelping box in a quiet spare room, low wooden sides, clean cream fleece blankets, soft afternoon daylight from a window. The tiny puppy wakes up at one end of the box while his littermates sleep in a pile at the far end. He lifts his round head and looks around, blinking slowly. Sound: quiet room, soft snoring from the pile. 5-10s (Squeaky try): Same whelping box, afternoon daylight on the cream fleece. The puppy sits back on his little bottom, opens his mouth and lets out a thin high squeak, his whole body jolting a bit with the effort. He stays very still for a moment afterward. Sound: a thin squeak, owner giggles quietly. 10-15s (First bark): Whelping box in a quiet spare room, low wooden sides, clean cream fleece blankets, soft daylight. The puppy stands on wobbly legs facing a small white plush lamb toy lying on the blanket, then gives one tiny proper bark at it, his folded ears flicking and his front feet hopping back slightly. Sound: one tiny bark, owner whispers "was that a bark?". 15-20s (Mom checks): Same whelping box, afternoon light. The mother, an adult female black-and-tan German Shepherd with a red collar, steps into the frame and lowers her head to sniff the puppy calmly, nose to nose. He wiggles his whole body and leans against her front leg. Sound: mom's soft sniffing, puppy squeak. 20-25s (Proud nap): Whelping box in the spare room, evening, a soft corner lamp switched on. The puppy lies curled on the cream fleece next to the plush lamb toy, his chin resting on it, eyes closing. The black-and-tan back and red collar of his mother show at the edge of the frame. Sound: quiet breathing, faint house hum.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Wakes up

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
