Wrestling With His Brother

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

An afternoon wrestling match on the living room carpet with his black-and-tan brother: a play bow, a pounce, a turn on top, a chase lap and a truce nap.

TIMELINE

0-5s	Play bow
5-10s	Pounce
10-15s	On top
15-20s	Chase lap
20-25s	Truce nap

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (Play bow): Living room with beige carpet and a grey couch, afternoon daylight from a big window. The puppy and his brother, a black-and-tan littermate with a thin green ribbon collar, face each other. The puppy drops into a clumsy play bow, rear end up, tail wagging. Sound: a playful yip, tags jingling. 5-10s (Pounce): Same living room, afternoon daylight on the carpet. The brother pounces and the two puppies roll over together in a soft tumble, little paws batting, mouths open in gentle play bites on each other's ears and necks. A couple of chew toys lie scattered on the carpet around them. Sound: playful growls, carpet rustling. 10-15s (On top): Living room carpet, afternoon light. The puppy ends up on top, standing over his brother with his big front paws on his chest, then the brother wiggles free and the puppy flops over onto his back with his legs in the air. Sound: squeaky growls, owner laughs "you lost". 15-20s (Chase lap): Living room, daylight from the window. The two puppies chase each other around a padded footstool in a wobbly circle, the puppy slipping a little on the carpet as he turns, ears flopping, the owner's feet in socks visible at the edge of the frame. Sound: paws thumping, quick panting. 20-25s (Truce nap): Living room floor beside the couch, late afternoon daylight. The puppy and his brother lie side by side, the puppy's head resting on his brother's back, both breathing fast at first, then slowly calming as their eyes close. A rope toy lies forgotten on the carpet just in front of their paws. Sound: slowing breaths, a soft sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Play bow

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
