Puppy Discovers His Tail

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The puppy notices his tail for the first time: staring at it, spinning after it, pouncing, finally catching it and flopping down dizzy.

TIMELINE

0-5s	Notices it
5-10s	First spin
10-15s	Pounce
15-20s	Got it
20-25s	Dizzy flop

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (Notices it): Kitchen with a beige tile floor, morning daylight from a window over the sink. The puppy sits on the floor and suddenly notices his own tail wagging behind him. He turns his head and stares at it, ears perked forward as far as they go. Sound: kitchen hum, owner whispers "uh oh". 5-10s (First spin): Same kitchen, morning daylight on the tile. The puppy turns in a wobbly circle trying to catch his tail, his oversized paws slipping a little on the smooth floor, then stops and looks around, confused about where it went. A steel water bowl and his food bowl sit by the cabinets behind him. Sound: paws skidding, owner laughs. 10-15s (Pounce): Kitchen floor, morning daylight. The puppy lies down, his tail flicks near his face, and he pounces on it with both front paws, then lets go in surprise when it moves again and jumps back a little. The white cabinets and a rubber mat by the back door show behind him. Sound: a tiny yip, paws tapping tile. 15-20s (Got it): Kitchen tile floor, morning light. The puppy finally gets the tip of his tail gently in his mouth, holding it while sitting curled up in a lopsided ball, eyes wide, staring up at the camera. His steel water bowl sits by the cabinets behind him and a dish towel hangs from the oven handle. Sound: owner says "you got it!". 20-25s (Dizzy flop): Kitchen with beige tile, morning daylight. The puppy lets go of his tail, sways, and flops onto his side on the cool tile, panting happily, his tail thumping the floor. The owner's slippered feet appear at the edge of the frame. Sound: panting, tail thumps, owner laughs.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Notices it

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
