One Ear Up, One Ear Down

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The puppy's one-ear-up phase: a lopsided morning look, head tilts, a shake that resets everything, a gentle ear fix and a bouncy trot.

TIMELINE

0-5s	Lopsided look
5-10s	Head tilt
10-15s	Shake reset
15-20s	Ear fix
20-25s	Bouncy trot

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (Lopsided look): Kitchen with a beige tile floor, morning daylight. The puppy sits looking up at the camera, his left ear standing straight up while his right ear flops down near his eye. He tilts his head and the floppy ear swings. Sound: owner laughs "what happened to your ear". 5-10s (Head tilt): Living room carpet, afternoon daylight from a window. The owner makes a soft squeak noise off camera. The puppy tilts his head side to side, the upright ear swiveling toward the sound while the other ear stays folded down. A few toys lie scattered on the carpet and a grey couch sits behind him. Sound: a squeak toy sound, a little whine. 10-15s (Shake reset): Backyard with patchy grass, overcast daylight. The puppy shakes his whole body, ears flapping, and after the shake both ears are flopped down for a moment, then one slowly pops back up again. The owner's sneakers stand nearby on the grass, a wooden fence behind, and a garden hose lies coiled at the edge of the yard. Sound: ear flaps, collar jingle, birds. 15-20s (Ear fix): Living room floor beside the couch, afternoon daylight. The puppy sits between the owner's knees. The owner's hand gently strokes the floppy ear upright, and it slowly falls back down again as the puppy licks the owner's wrist. The owner's other hand rests on his back, a woven rug under them. Sound: owner says "almost", soft licks. 20-25s (Bouncy trot): Backyard, overcast light, uneven grass and a wooden fence. The puppy trots toward the camera across the grass, the upright ear bouncing and the floppy one flapping with each step, then sits down at the owner's feet. A garden hose lies coiled near the fence behind him. Sound: paws on grass, panting.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Lopsided look

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
