Big Paws, Little Puppy

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

All about his oversized paws: a low view of his big feet, a paw on the owner's hand, a stumble in the grass, a missed ball swat and paws hanging over his bed.

TIMELINE

0-5s	Big feet
5-10s	Paw comparison
10-15s	Grass stumble
15-20s	Missed swat
20-25s	Paws over the edge

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (Big feet): Hallway with a light wood floor, morning daylight from a window by the door. The camera is held low near the floor looking at the puppy standing, his oversized fuzzy front paws looking far too big for his short legs. He takes a step and his paw lands with a soft thud. Sound: paw thud, owner laughs. 5-10s (Paw comparison): Living room carpet, morning daylight. The owner's hand lies flat next to the puppy's front paw for comparison. The puppy sniffs the hand, then plops his big paw right on top of it and looks up at the camera. A grey couch and a few scattered toys show behind him. Sound: owner says "look at that paw". 10-15s (Grass stumble): Backyard, overcast daylight, patchy grass and a wooden fence. The puppy trots toward the camera and his big front paws catch on a tuft of grass, making him stumble forward onto his chest. He pops back up and keeps going. Sound: a soft thump, birds. 15-20s (Missed swat): Kitchen with a beige tile floor, morning light. The owner's hand rolls a small rubber ball across the floor. The puppy swats at it with his big front paw, misses, and his paw slides out sideways so he lands on his belly. Sound: ball rolling, paws skidding, owner laughs. 20-25s (Paws over the edge): Living room, late afternoon, a lamp switched on in the corner. The puppy sleeps on his side in a grey dog bed with his big paws stretched out over the edge, looking far bigger than the rest of him, toes twitching. Sound: quiet breathing, a tiny sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Big feet

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
