First Time Hearing the Doorbell

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A hallway nap gets interrupted by the doorbell: a startled wake-up, a tiny woof, a brave sniff at the door, inspecting a delivered box and a calm treat on the doormat.

TIMELINE

0-5s	Hallway nap
5-10s	The bell rings
10-15s	Brave sniff
15-20s	Inspecting the box
20-25s	Treat and calm

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (Hallway nap): Front hallway of a family home, late morning daylight from a small window beside the door, shoes and a coir doormat on the wooden floor. The dog is asleep on a folded grey blanket near the bottom of the stairs, curled into a ball, belly rising and falling, one oversized paw twitching in his sleep. Sound: quiet house, soft puppy breathing, a clock ticking somewhere. 5-10s (The bell rings): Same hallway, soft morning daylight. The doorbell rings. The dog's head pops up, his floppy ears lifting and his eyes wide. He scrambles to his feet, wobbles a little, and lets out a tiny high-pitched woof toward the closed white front door, then looks back at the camera unsure. Sound: ding-dong doorbell, tiny woof, claws scrabbling on wood. 10-15s (Brave sniff): Hallway by the front door, natural daylight from the side window. The dog creeps toward the door with his body stretched long and low, tail half up, and sniffs the gap under the door very seriously. When the bell rings a second time he hops backward, then creeps forward and sniffs again. Sound: second doorbell, deep sniffing, owner whispers "who's there?". 15-20s (Inspecting the box): Hallway with the front door now open, bright overcast daylight from the porch outside. The owner's hands set a brown cardboard box on the wooden floor. The dog approaches it carefully, sniffs every corner, then gives it a tiny paw tap and jumps backward when the box slides a little. Sound: cardboard scraping, sniffing, a car driving off outside. 20-25s (Treat and calm): Hallway floor, late morning daylight, the front door closed again. The owner kneels and offers a small puppy training treat on an open palm. The dog sits clumsily, takes it gently and crunches it, then flops down on the doormat with his chin resting on the owner's sneaker, calm again. Sound: crunching, a big puppy sigh, owner says "just a package, buddy".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Hallway nap

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. Front hallway of a family home, late morning daylight from a small window beside the door, shoes and a coir doormat on the wooden floor. The dog is asleep on a folded grey blanket near the bottom of the stairs, curled into a ball, belly rising and falling, one oversized paw twitching in his sleep. Sound: quiet house, soft puppy breathing, a clock ticking somewhere.

Clip 2 | 5-10s | The bell rings

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
