First Squeaky Toy

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

An evening with his first squeaky toy: a careful sniff, a shocked jump at the first squeak, brave shaking, a squeaky lap of the room and falling asleep on it.

TIMELINE

0-5s	New toy sniff
5-10s	The first squeak
10-15s	Brave shake
15-20s	Squeaky lap
20-25s	Asleep on it

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (New toy sniff): Living room with a wooden floor and a faded striped rug, evening, ordinary warm table lamp light. The owner's hand sets a small plush yellow duck toy on the rug in front of the dog. He sniffs it carefully, nudging it a little with his brown nose. Sound: TV murmuring in the background, sniffing, owner says "that's for you". 5-10s (The first squeak): Same striped rug, warm lamp light. The dog bites down on the duck and it squeaks loudly. He drops it instantly, jumps back with his front legs splayed wide, and stares at it with his head tilted and ears lifted, frozen for a moment. Sound: loud squeak, owner bursts out laughing. 10-15s (Brave shake): Living room rug, evening lamp light, sofa behind. The dog creeps back to the duck, gives it a careful paw tap, then bites again. Squeak. This time he holds on, shaking his head side to side with a tiny puppy growl, his tail wagging fast. Sound: squeak, squeak, little growls. 15-20s (Squeaky lap): Living room wooden floor, warm lamp light, a sofa leg in frame. The dog trots around the room carrying the duck, squeaking it with every step, trips over the edge of the rug, then flops down beside the sofa still chewing it happily. Sound: constant squeaking, paws on wood, owner says "we'll never sleep again". 20-25s (Asleep on it): Soft grey dog bed in the corner of the living room, evening lamp light. The dog has fallen asleep curled up with his chin resting on the yellow duck and one paw over it. When he shifts in his sleep, the toy lets out one soft squeak and his ear twitches. Sound: soft snoring, one faint squeak, owner whispers "goodnight".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | New toy sniff

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. Living room with a wooden floor and a faded striped rug, evening, ordinary warm table lamp light. The owner's hand sets a small plush yellow duck toy on the rug in front of the dog. He sniffs it carefully, nudging it a little with his brown nose. Sound: TV murmuring in the background, sniffing, owner says "that's for you".

Clip 2 | 5-10s | The first squeak

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
