First Time Watching a Ball Roll

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The puppy figures out a rolling ball: a startled first nudge, following it down the hallway, getting spooked when it rolls back, nosing it across the carpet and a first tiny fetch.

TIMELINE

0-5s	It moved
5-10s	Following the ball
10-15s	It rolls back
15-20s	Nosing it along
20-25s	First tiny fetch

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (It moved): Long hallway with a light wooden floor, late afternoon daylight from a window at the far end. The owner's hand sets a small red rubber ball on the floor in front of the dog. He sniffs it, it rolls an inch away from his nose, and he jumps back in surprise. Sound: quiet house, tiny rubber bump, owner chuckles. 5-10s (Following the ball): Same hallway, afternoon daylight. The owner's hand gently rolls the ball down the hallway. The dog watches it go with his head turning, ears perked, then waddles after it with clumsy steps, his oversized paws slipping a little on the smooth wooden floor. Sound: ball rolling on wood, claws clicking, owner says "get it!". 10-15s (It rolls back): End of the hallway near a closed white door, afternoon daylight. The ball bumps the door and rolls back toward the dog. He stops, stares, and backs up as it comes toward him, then pounces on it with both front paws and misses completely. Sound: soft bump on the door, scrabbling paws, owner laughing. 15-20s (Nosing it along): Living room with a beige carpet, soft afternoon daylight, sofa in the background. The dog lies on his belly with the red ball between his front paws, chews on it, then nudges it with his nose and watches it roll a short way across the carpet before crawling after it. Sound: chewing on rubber, soft rolling, puppy huffs. 20-25s (First tiny fetch): Same living room, late afternoon daylight. The owner's hand rolls the ball gently back to him. The dog grabs it in his mouth, carries it two wobbly steps toward the owner, drops it, and plops down on the carpet panting with his tongue out. Sound: ball dropping, panting, owner says "you brought it back!".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | It moved

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. Long hallway with a light wooden floor, late afternoon daylight from a window at the far end. The owner's hand sets a small red rubber ball on the floor in front of the dog. He sniffs it, it rolls an inch away from his nose, and he jumps back in surprise. Sound: quiet house, tiny rubber bump, owner chuckles.

Clip 2 | 5-10s | Following the ball

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
