First Time Carrying a Stick

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

On a park trail the puppy finds his first stick: a careful sniff, a proud wobbly carry, getting stuck between two trees, a swap for a chew toy and a happy walk back.

TIMELINE

0-5s	Finding the stick
5-10s	Proud carry
10-15s	Stuck between trees
15-20s	Swap for a toy
20-25s	Walk back

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (Finding the stick): Wooded park path, cool overcast afternoon, damp dirt trail with fallen twigs and moss. The dog walks on his leash beside the owner's hiking boots, then stops at a short smooth stick lying on the ground and sniffs it carefully from one end to the other. Sound: birds in the trees, footsteps on dirt, sniffing. 5-10s (Proud carry): Same trail, soft grey daylight through the trees. The dog grabs the stick in the middle with his mouth, lifts his head proudly and staggers forward because the stick is a little too wide, one end bumping the ground with every wobbly step. Sound: stick scraping the dirt, owner laughing "look at you". 10-15s (Stuck between trees): Park path, overcast daylight, ferns along the edge. The dog tries to walk between two tree trunks with the stick sideways in his mouth. The stick bumps both trees and he stops, confused, then backs up and turns his head until he squeezes through. Sound: thunk of wood on bark, owner says "turn it, buddy". 15-20s (Swap for a toy): Grassy clearing next to the trail, cool overcast afternoon. The dog lies down in the grass holding the stick between his paws and starts to gnaw the bark. The owner's hand reaches in and swaps it for a rubber chew toy, and he takes the toy happily. Sound: gnawing, owner says "let's trade", rubber squeak. 20-25s (Walk back): Trail heading back toward the parking area, grey afternoon light, tall trees on both sides. The dog trots along on his leash carrying the rubber chew toy, tail high, looking back over his shoulder at the stick lying on the path. The owner's boots walk beside him. Sound: footsteps, collar tag jingle, birds.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Finding the stick

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
