First Trip to the Pond

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The puppy's first visit to a calm pond with the owner right beside him: staring at the water, a paw dip, paddling at the very edge, a dragonfly and a towel rub on the grass.

TIMELINE

0-5s	Staring at the water
5-10s	Paw dip
10-15s	Paddling the edge
15-20s	Dragonfly
20-25s	Towel rub

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (Staring at the water): Grassy bank of a small calm pond, warm late afternoon, clear natural daylight, reeds and cattails along the edge. The dog walks on a long light leash beside the owner's bare legs and sandals, then stops to stare at the flat water with his ears up. Sound: frogs croaking, birds, a light breeze. 5-10s (Paw dip): Same pond edge, sunny daylight, a muddy shallow shoreline. The dog stretches his neck to sniff the water, then dips one front paw in at the very edge. The owner crouches right beside him, holding the leash short and loose. Sound: tiny splash, sniffing, owner says "it's wet, huh?". 10-15s (Paddling the edge): Shallow muddy edge of the pond, warm late afternoon light. The dog paddles his front paws in water barely past his toes, splashing and wagging. The owner's hand stays close to his side, the owner's ankles in the water right next to him. Sound: little splashes, happy panting, owner laughing. 15-20s (Dragonfly): Pond edge near the reeds, soft late afternoon daylight. A dragonfly hovers over the water and the dog watches it, snaps at the air once, then steps back out onto the grass. He shakes his body hard, water flying from his legs and belly. Sound: buzzing wings, shaking, owner says "whoa, shower". 20-25s (Towel rub): Grassy bank away from the water, late afternoon light, an old striped towel spread on the grass. The owner's hands rub the dog dry as he sits on the towel panting, his tan legs wet and paws muddy. He looks back toward the pond, then lies down. Sound: towel rubbing, frogs, tired puppy sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Staring at the water

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
