First Fallen Apple in the Garden

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The puppy discovers a fallen apple under the tree: a sniff, a roll down the slope, trying to fit it in his mouth, the owner swapping it for a safe slice and begging at the apple basket.

TIMELINE

0-5s	Finding the apple
5-10s	Rolling it
10-15s	Too big to carry
15-20s	The swap
20-25s	Begging at the basket

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (Finding the apple): Backyard garden in early autumn, cool afternoon, overcast daylight, an old apple tree with a few red apples fallen in the long grass. The dog wanders under the tree with his nose to the ground and stops at a small red apple, sniffing it all over. Sound: birds, leaves rustling, sniffing. 5-10s (Rolling it): Same spot under the apple tree, soft grey daylight. The dog nudges the apple with his nose and it rolls a short way down the gentle slope. He follows it with bouncy steps, ears flopping, and pounces on it with both front paws. Sound: soft thud of the apple, grass rustling, owner laughing. 10-15s (Too big to carry): Long grass under the apple tree, overcast afternoon. The dog lies on his belly holding the apple between his paws, licking it and trying to fit it in his mouth, but it is too big. It rolls away again and he wiggles after it on his belly. Sound: licking, small frustrated huff, owner says "too big, buddy". 15-20s (The swap): Garden under the apple tree, cool daylight. The owner's hand takes the apple away before he can bite into the core and offers a small peeled slice of apple with no core or seeds on an open palm. The dog takes the slice gently and crunches it. Sound: crunching, owner says "this piece is safe for you". 20-25s (Begging at the basket): Back patio next to the garden, late afternoon daylight, a basket of picked apples on a wooden table. The dog sits on the patio stones beside the owner's boots, licking his lips and staring up at the basket, then flops down with a big sigh. Sound: a big puppy sigh, birds, owner chuckles "nice try".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Finding the apple

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
