First Leash Walking Lessons

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The first leash lessons: wearing the leash in the hallway, first steps in the front yard, following treats along the sidewalk, sitting at the corner and being carried home tired.

TIMELINE

0-5s	Leash indoors
5-10s	Front yard steps
10-15s	Treat at the leg
15-20s	Sit at the corner
20-25s	Carried home

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (Leash indoors): Front hallway in the morning, daylight from a small door window, a coat rack and shoes by the door. The owner clips a thin light blue leash to the dog's collar. He sniffs it, then bites the leash and shakes it. The owner offers a toy and he lets go. Sound: leash clip click, puppy growl, owner laughs "not food". 5-10s (Front yard steps): Small front yard in the morning, cool overcast light, short grass, a concrete path and a mailbox. The leash hangs loose as the owner walks slowly. The puppy stops, sits, then follows after a few kissy sounds, taking big clumsy steps on the grass. Sound: birds, kissy sounds, owner says "this way". 10-15s (Treat at the leg): Quiet residential sidewalk, overcast morning, cracked concrete and a row of trash bins by the curb. The owner's hand holds a tiny treat at knee height. The dog trots next to the owner's sneakers with the leash loose, looking up at the hand every few steps. Sound: footsteps, tags jingling, owner says "good, stay close". 15-20s (Sit at the corner): Street corner in the same quiet neighborhood, overcast daylight, a curb ramp and a lamppost. The owner stops before the curb. The puppy stops too and sits on the sidewalk beside the owner's foot, looking around at a parked car. The hand gives him a treat. Sound: distant traffic, birds, owner says "nice sit, buddy". 20-25s (Carried home): Same sidewalk heading back, overcast daylight, trees along the road. The puppy has flopped down on the concrete and refuses to move. The owner scoops him up with two hands and holds him against the chest, his paws dangling and his head resting on the owner's arm. Sound: owner laughs "okay, taxi home", footsteps, puppy sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

FACEBOOK CAPTION

Walked about 40 meters. Got carried for 40 more.
Did your puppy also do the leash flop?

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
