Potty Bell Training

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Teaching the potty bell: introducing the fabric bell strip, a nose touch for a treat, going out to the potty spot, a happy reward on the grass and ringing the bell all by himself.

TIMELINE

0-5s	Meet the bells
5-10s	Nose touch
10-15s	Potty spot
15-20s	Grass party
20-25s	Rings it himself

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (Meet the bells): Back door of a kitchen in the early morning, cool daylight through the door glass, a fabric strip of small bells hanging from the door handle at puppy height. The dog sniffs the bells carefully, ears perked, and jumps back when they jingle. Sound: bells jingling, owner laughs softly "it's okay". 5-10s (Nose touch): Same back door, early morning light, beige tile floor. The owner's hand rubs a tiny treat on the bells. The puppy pushes his nose against the strip, the bells ring, and right away the owner gives him the treat and opens the door. Sound: bells ringing, owner says "yes! outside!", door handle click. 10-15s (Potty spot): Backyard just after sunrise, pale morning light, dewy grass and a small gravel corner by the fence. The puppy walks to the grass near the gravel, sniffing in circles. The owner stands nearby in slippers, the camera watching quietly from a few steps away. Sound: morning birds, quiet footsteps, owner whispers "go potty". 15-20s (Grass party): Same backyard, pale morning light, dewy grass. The puppy trots back toward the owner, who kneels and gives him a treat and a big chest rub. He wiggles his whole back end and bounces once on the wet grass, ears flopping. Sound: owner cheers "good potty!", birds, happy panting. 20-25s (Rings it himself): Kitchen in the evening, ordinary ceiling light, dark window in the back door. The camera is filming from the counter as the puppy walks to the door by himself and bumps the bell strip with his nose twice, then looks back at the owner, waiting. Sound: bells jingling, owner gasps "did you just do that?".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Meet the bells

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
