Handling Practice for Ears and Paws

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Gentle handling practice with a treat for each touch: ears, paws, a peek at his teeth, a tail stroke and a sleepy cuddle at the end.

TIMELINE

0-5s	Ear touch
5-10s	Paw hold
10-15s	Teeth peek
15-20s	Tail stroke
20-25s	Sleepy cuddle

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (Ear touch): Living room on a quiet afternoon, soft daylight from a window, the puppy lying on a fluffy cream rug. The owner's hand gently lifts one floppy ear and looks inside for a second, then lets it fall. The other hand gives him a tiny treat. Sound: quiet room, crunching, owner says softly "good ears". 5-10s (Paw hold): Same living room, soft afternoon daylight, cream rug. The owner's hand holds one of the puppy's big front paws and gently presses the pads with a thumb. He watches, pulls the paw back once, then lets it be held again and gets a treat. Sound: soft rustling, owner whispers "there we go". 10-15s (Teeth peek): Living room, afternoon daylight, the puppy sitting on the rug. The owner's fingers gently lift his upper lip on one side to show small white puppy teeth for a second, then let go. He licks his lips and the other hand rewards him with a treat. Sound: lip smacking, owner says "so many little teeth". 15-20s (Tail stroke): Same rug, soft afternoon daylight, a sofa edge in the background. The puppy stands chewing a treat while the owner's hand strokes slowly down his back and along his fluffy tail. He wags at the touch and turns his head to sniff the hand. Sound: tail swishing, owner laughs quietly. 20-25s (Sleepy cuddle): Living room in the late afternoon, warmer daylight now, the cream rug. The puppy has rolled onto his side and the owner's hand rests on his chest. His eyes close slowly and one paw twitches while the owner gently rubs behind his ear. Sound: quiet breathing, a little puppy sigh, distant birds outside.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Ear touch

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
