Gentle Mouth Practice

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Learning a gentle mouth: a nip makes the hand go still, a toy is offered instead, soft licks earn praise, a child practices with a parent and he settles with a teething ring.

TIMELINE

0-5s	The nip
5-10s	Toy instead
10-15s	Soft licks
15-20s	Child practice
20-25s	Teething ring

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (The nip): Living room floor on a sunny afternoon, daylight from a window, a light grey carpet and scattered toys. The puppy plays with the owner's hand and nips the fingers with his sharp puppy teeth. The hand goes completely still and limp on the carpet. Sound: playful growl, owner says calmly "ouch", then silence. 5-10s (Toy instead): Same living room, afternoon daylight, grey carpet. The still hand stays put and the owner's other hand offers a knotted rope toy. The puppy lets go of the fingers, grabs the rope and chews it eagerly, shaking his head. The still hand slowly slides away and rests on the owner's knee. Sound: rope rustling, puppy growls, owner says "yes, this one". 10-15s (Soft licks): Living room, afternoon daylight, the puppy sitting on the carpet. The owner offers an open hand near his face. He sniffs it and gives it a few soft licks instead of biting. The hand gently strokes his cheek and gives him a treat. Sound: licking sounds, owner says softly "gentle, good boy". 15-20s (Child practice): Same living room, afternoon daylight. A girl around eight sits cross-legged on the carpet with her mother kneeling right beside her. She holds a rubber chew toy flat for the puppy. He takes it calmly and chews while the mother guides her hand to pet his back. Sound: girl giggles, mother says "nice and soft", chewing. 20-25s (Teething ring): Living room in the early evening, a table lamp switched on, the puppy lying on a fluffy round bed. He chews a textured rubber teething ring held between his big paws, eyes getting heavy. The owner's hand rests nearby, not moving. Sound: quiet chewing, soft TV in another room.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | The nip

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
