Making the Crate a Happy Place

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Making the crate a happy place: tossing treats inside, dinner in the crate with the door open, a cozy blanket and chew, a nap with the door open and a morning stretch out.

TIMELINE

0-5s	Treat toss
5-10s	Dinner inside
10-15s	Cozy setup
15-20s	Door-open nap
20-25s	Morning stretch

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (Treat toss): Corner of a bedroom in the morning, daylight from a window, a wire crate with the door wide open and a soft grey pad inside. The owner tosses a tiny treat inside. The puppy steps in with his front paws only, grabs it, and backs out quickly. Sound: treat bouncing on the pad, owner says "good job". 5-10s (Dinner inside): Same bedroom corner in the evening, a ceiling light on, the crate door open. The owner's hand sets a small steel bowl of puppy kibble at the back of the crate. The puppy walks all the way in and eats, tail wagging and sticking out of the door. Sound: kibble crunching, bowl clinking on the wire. 10-15s (Cozy setup): Bedroom corner, warm lamp light in the evening. The owner's hands lay a fleece blanket and a rubber chew toy inside the crate. The puppy walks in by himself, turns in a circle on the blanket and lies down with the chew between his paws. Sound: soft rustling, owner whispers "there you go". 15-20s (Door-open nap): Same bedroom, dim lamp light at night, the crate door still open. The puppy is fast asleep inside on the fleece blanket, curled into a ball with his nose tucked under his tail. The camera peeks in quietly from the floor. Sound: soft snoring, a clock ticking, quiet house. 20-25s (Morning stretch): Bedroom early the next morning, pale daylight through curtains. The puppy walks out of the open crate, does a long front stretch with his bottom in the air, then a big yawn, and trots to the owner's slippers by the bed. Sound: squeaky yawn, tags jingling, owner laughs "good morning".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Treat toss

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
