First Puzzle Feeder

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

His first puzzle feeder: sniffing the new toy, pawing at it, pushing it across the floor, finding the sliding covers and licking the board clean.

TIMELINE

0-5s	Meet the puzzle
5-10s	Paw attempt
10-15s	Pushing it
15-20s	Slide figured out
20-25s	Licking clean

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (Meet the puzzle): Kitchen on a rainy afternoon, grey daylight through the window, beige tile floor. The owner's hands place a round plastic puzzle board with small sliding covers on the floor. The puppy walks over and sniffs it all over, tail slowly wagging. Sound: rain on the window, plastic clacking on tile, sniffing. 5-10s (Paw attempt): Same kitchen, rainy grey daylight. The puppy slaps the puzzle with one big front paw, then the other, the board rattling. One sliding cover moves and a kibble rolls out. He gobbles it up quickly. Then he sniffs the board again, nose pressed against the covers. Sound: rattling plastic, crunching, owner laughs "you got one". 10-15s (Pushing it): Kitchen, grey rainy daylight, tile floor. The puppy pushes the puzzle board with his nose across the floor until it bumps into the cabinet. He follows it, sniffing hard at the covers, his tail wagging. A few kibbles rattle inside the board. Sound: plastic scraping on tile, sniffing, rain. 15-20s (Slide figured out): Same kitchen corner by the cabinet, grey daylight. The puppy noses one of the sliding covers to the side, finds a kibble underneath, eats it, then moves straight to the next cover and does it again with his nose. His ears flop forward as he concentrates. Sound: plastic click, crunch, owner whispers "he's figuring it out". 20-25s (Licking clean): Kitchen, rainy late afternoon, a ceiling light now on. The puzzle board is empty. The puppy licks every hole one more time, then lies down beside it on the tile and looks up at the camera, licking his lips. A few crumbs are left on the tiles near his paws. Sound: licking, rain on the window, owner says "all gone".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Meet the puzzle

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
