Learning to Shake Paw

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Learning shake paw on the porch: pawing at a closed hand, paw on the palm, a repeat with the other paw, shaking hands with a child and a celebration chew.

TIMELINE

0-5s	Paw at fist
5-10s	Paw on palm
10-15s	Other paw
15-20s	Child shake
20-25s	Celebration chew

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (Paw at fist): Front porch on a mild afternoon, soft daylight, grey painted floorboards and a potted fern. The owner holds a closed fist with a treat inside low in front of the seated puppy. He sniffs it, then lifts a big front paw and paws at the fist. Sound: birds, owner says "yes!", crunching. 5-10s (Paw on palm): Same porch, soft afternoon daylight. The owner holds out an open palm. The puppy lifts his paw and places it on the hand for a second. The hand gently holds it, then lets go and gives him a treat from the other hand. Sound: owner says "shake, good boy", tail thumping on boards. 10-15s (Other paw): Front porch, afternoon daylight, the puppy sitting on the boards. The owner offers the other hand. He lifts the wrong paw first, then switches and puts his left paw on the palm, wobbling a little in the sit. The owner's hand holds the paw for a second and gives him a treat. Sound: owner laughs "close enough", birds. 15-20s (Child shake): Same porch, soft daylight, a girl around seven kneels in front of the puppy with her father sitting on the step right next to her. She holds out her hand. The puppy puts his paw on it and she giggles while the father hands her a treat for him. Sound: girl giggles "he shook my hand!", father laughs. 20-25s (Celebration chew): Front porch in the late afternoon, softer daylight. The puppy lies on a small doormat chewing a puppy-safe rubber chew toy held between his paws. The owner's hand pats his back and the street behind is quiet. A bicycle leans against the porch railing. Sound: steady chewing, a distant dog bark, owner says "well earned".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Paw at fist

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
