Barking at His Own Toy

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The puppy squeaks his plush hedgehog by accident, gets startled, and spends the video barking, sneaking up on and finally cuddling his own toy.

TIMELINE

0-5s	Accidental squeak
5-10s	Barking at it
10-15s	Sneaking closer
15-20s	Nose boop
20-25s	Best friends now

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (Accidental squeak): Bedroom in the late morning, daylight through white blinds, light grey carpet, a dog bed in the corner. The puppy steps onto a small brown plush hedgehog toy, it squeaks loudly, and he jumps back with all four paws, ears flying up, staring at it. Sound: loud squeak, a startled puppy huff, owner laughs. 5-10s (Barking at it): Same bedroom, soft daylight through blinds. The puppy stands a little distance from the plush hedgehog lying on the carpet, front legs stiff and spread, and barks at it in short squeaky bursts, backing up a tiny step after every bark. Sound: tiny high barks, owner says "it's your toy". 10-15s (Sneaking closer): Same bedroom carpet, morning light. The puppy stretches his neck as far as he can, creeping forward low on his belly, and sniffs the plush hedgehog from as far away as possible. His tail gives an unsure wag, his nose twitching. Sound: quiet sniffing, owner holding back laughter. 15-20s (Nose boop): Bedroom floor in soft daylight, grey carpet. The puppy pokes the hedgehog with his nose, it squeaks again, he hops back with a little bark, then quickly pounces forward and grabs it in his mouth, shaking it side to side with his ears flopping. Sound: squeak, small bark, squeaking while he shakes it. 20-25s (Best friends now): Puppy bed in the bedroom corner, soft daylight through the blinds. The puppy carries the plush hedgehog into his round grey bed, lies down and curls around it, resting his chin on top of the toy. He blinks slowly at the camera. Sound: soft rustling of the bed, a contented sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Accidental squeak

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
