Trying to Carry a Giant Stick

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

At the park the puppy finds a stick far too big for him and tries to carry it home, bumping into things, until he settles for a small piece.

TIMELINE

0-5s	The find
5-10s	Lifting it
10-15s	Too wide
15-20s	Rest break
20-25s	A smaller prize

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (The find): Quiet neighborhood park on a cool autumn morning, overcast sky, short grass with fallen brown leaves, a wooden bench nearby. The puppy on a light blue leash sniffs a long fallen branch twice his length lying in the grass, his tail starting to wag hard. Sound: breeze in the trees, leaves rustling, owner says "oh no". 5-10s (Lifting it): Same park, overcast morning, grass with leaves. The puppy grabs the branch in the middle and lifts it with effort, his head tilting under the weight, both ends dragging in the grass. He takes a few proud wobbly steps forward. Sound: branch scraping the grass, puppy grunts, owner laughing. 10-15s (Too wide): Park path between two short wooden posts, overcast daylight, a gravel walkway. The puppy walks toward the gap carrying the long branch sideways, and both ends bump into the posts, stopping him. He stands there holding it, tail still wagging. Sound: wood knocking on wood, gravel crunching, owner says "turn it, buddy". 15-20s (Rest break): Grass beside the park path, cloudy morning light, scattered leaves. The puppy drops the branch and lies down next to it, panting, one paw resting on it so nobody can take it. The owner's sneakers stand beside him on the grass. Sound: puppy panting, distant dog barking, wind. 20-25s (A smaller prize): Same park in overcast daylight, gravel path. The owner's hand offers a short smooth piece of the stick, and the puppy takes it and trots happily along the path with it, leash loose, tail high. The big branch stays behind on the grass. Sound: gravel crunching, owner says "much better size".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | The find

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
