Tumbling Down the Grassy Slope

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

On a short, soft and gentle grassy slope in the park, the puppy runs down, rolls over in the thick grass, runs back up and does it again with the owner right beside him.

TIMELINE

0-5s	At the top
5-10s	Bouncy run down
10-15s	The soft roll
15-20s	Climbing back up
20-25s	Grass snack nap

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (At the top): Park on a mild spring afternoon, soft natural daylight, a very short and gentle grassy slope only a few steps long, thick soft green grass and dandelions. The puppy stands at the top beside the owner's sneakers, looking down the little hill with his tail wagging. Sound: birds, children far away, owner says "ready?". 5-10s (Bouncy run down): Same gentle grassy slope, spring daylight. The puppy bounds down the short slope with big clumsy hops, his oversized paws flopping and ears bouncing. The owner walks down right beside him, only their legs in jeans visible. They stay ready to steady him. Sound: soft paws on grass, puppy yips, owner laughing. 10-15s (The soft roll): Bottom of the gentle slope in thick soft grass, spring afternoon light. The puppy's front paws get ahead of him and he rolls once onto his side in the cushy grass, then lies on his back with his paws in the air, totally happy and unhurt. Sound: grass rustling, a happy puppy grunt, owner says "you okay? silly". 15-20s (Climbing back up): Same short grassy slope, soft daylight, dandelions. The puppy scrambles back up the gentle incline with his tail high, grass stuck to his fluffy coat, and trots straight to the owner's crouching legs at the top. The owner's hand brushes grass off his back. Sound: panting, grass rustling, owner says "again?". 20-25s (Grass snack nap): Top of the slope on a spread picnic blanket, spring afternoon light, trees in the background. The puppy lies on the plaid blanket with grass in his fur, panting happily, drinks from a small travel bowl the owner holds, then rests his head down. Sound: lapping water, birds, owner says "best hill ever".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | At the top

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
