His Ears Stand Up at Last

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The puppy's ears have been flopping for weeks, and today they finally stand: one ear up, one down, both up, a flop during play, and both up proudly at the end.

TIMELINE

0-5s	One up, one down
5-10s	Sound check
10-15s	Floppy play
15-20s	Both up
20-25s	Proud portrait

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 4-month-old male liver-and-tan German Shepherd puppy, growing lanky, chocolate-brown saddle, tan legs and face, brown nose, amber eyes, big ears starting to stand, wearing a light blue collar. 0-5s (One up, one down): Kitchen in the morning, daylight through the window, light tile floor. The puppy sits facing the camera with his left ear standing tall and his right ear folded over at the tip, looking lopsided. He blinks and tilts his head slightly. Sound: quiet kitchen, owner laughs "halfway there". 5-10s (Sound check): Same kitchen, morning light. The owner's hand taps a spoon on a mug off camera. Both of the puppy's ears snap upward for a second, standing tall together, then the right one slowly folds back down as he relaxes. He looks back at the camera. Sound: spoon clinking on a mug, owner gasps "there they are". 10-15s (Floppy play): Backyard at midday, bright natural daylight, patchy grass and a wooden fence. The puppy runs in loops with a rope toy, his ears flopping and bouncing wildly in every direction as he moves, lanky legs stretching. The owner's sneakers stand nearby on the grass, and a ball rolls past. Sound: fast paws on grass, owner laughing "they can't decide". 15-20s (Both up): Same backyard, midday light. The puppy stops and stares at a bird on the fence, and both ears rise and stand fully upright, tall and pointed, the tips trembling slightly. He holds still, alert, tail out behind him. Then he glances back at the owner. Sound: bird chirping, owner whispering "don't move". 20-25s (Proud portrait): Front porch in the late afternoon, warm natural daylight, grey painted boards. The puppy sits calmly beside the owner's legs with both ears standing straight up, looking out at the street. The owner's hand gently scratches his chest. He leans into it happily. Sound: breeze, distant car, owner says "look at those ears".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | One up, one down

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
